

PLAN OF ACTION: ENVIRONMENT

ENVIRONMENT

Mission: Reduce pollution of air, water, and land; increase global awareness and collaboration on environmental concerns; and find alternative energy sources that are environmentally friendly and sustainable.

Strategic Actions:

- Become a personal model of environmental responsibility by reducing consumption, reusing, and recycling
 - Work to build community awareness of global warming and climate changes.
 - Join and assist environmental groups
 - Support farmers' markets
 - Educate yourself and others about environment sustainability
 - Start local community gardens
 - Present environmental symposiums and programs to organizations, churches and schools.
 - Work with local corporations on environmental practices that include monitoring
 - Encourage local media to participate in environmental education
 - Contact elected leaders to support environmental legislation, provide incentives for industries to reduce pollution, and raise environmental standards imposed by the government.
-
